Sublime Text 4 is the current version of Sublime Text. For bleeding-edge releases, see the [dev builds](#).

Version: Build 4200

- [macOS](#)
- [Windows](#) - also available as a [portable version](#)
- [Linux repos](#) - [direct downloads](#)

Sublime Text may be downloaded and evaluated for free, however a license must be [purchased](#) for continued use. There is currently no enforced time limit for the evaluation.

Changelog

BUILD 4200

21 May 2025

We're planning on making some changes to the supported plugin Python versions. See the [Blog post](#) for more details.

NEW FEATURES AND IMPROVEMENTS

- Sidebar can now be moved to the right side using the `"sidebar_on_right"` setting
- Build systems can now optionally have an input box by using `"interactive": true`
- Added `"disable_plugin_host_3.3"` setting. This causes all plugins to run under 3.8
- Rewritten syntax highlighting for SQL, ActionScript, Diff, Bash and Graphviz thanks to [jrappen](#), [michaelblyons](#), [keith-hall](#) and [deathaxe](#)
- Added Zsh and TOML syntax highlighting thanks to [deathaxe](#)

Visual Studio Code

smoother background updates.

Install VS Code on Windows

Choose User setup or System setup

VS Code provides both Windows user-level and system-level setups.

Expand table

Setup type	Use when	Notes
User setup	Install VS Code for your Windows account.	This setup does not require administrator permissions. It installs under <code>%LOCALAPPDATA%\Programs\Microsoft VS Code</code> and provides the smoothest update experience. Updates are disabled when VS Code runs as Administrator from a User setup installation.
System setup	Install VS Code for all users on the machine.	This setup requires administrator permissions and installs under <code>Program Files</code> . In-product updates also require elevation.

See the [Download Visual Studio Code](#) page for the full list of installation options.

Install with the Windows installer

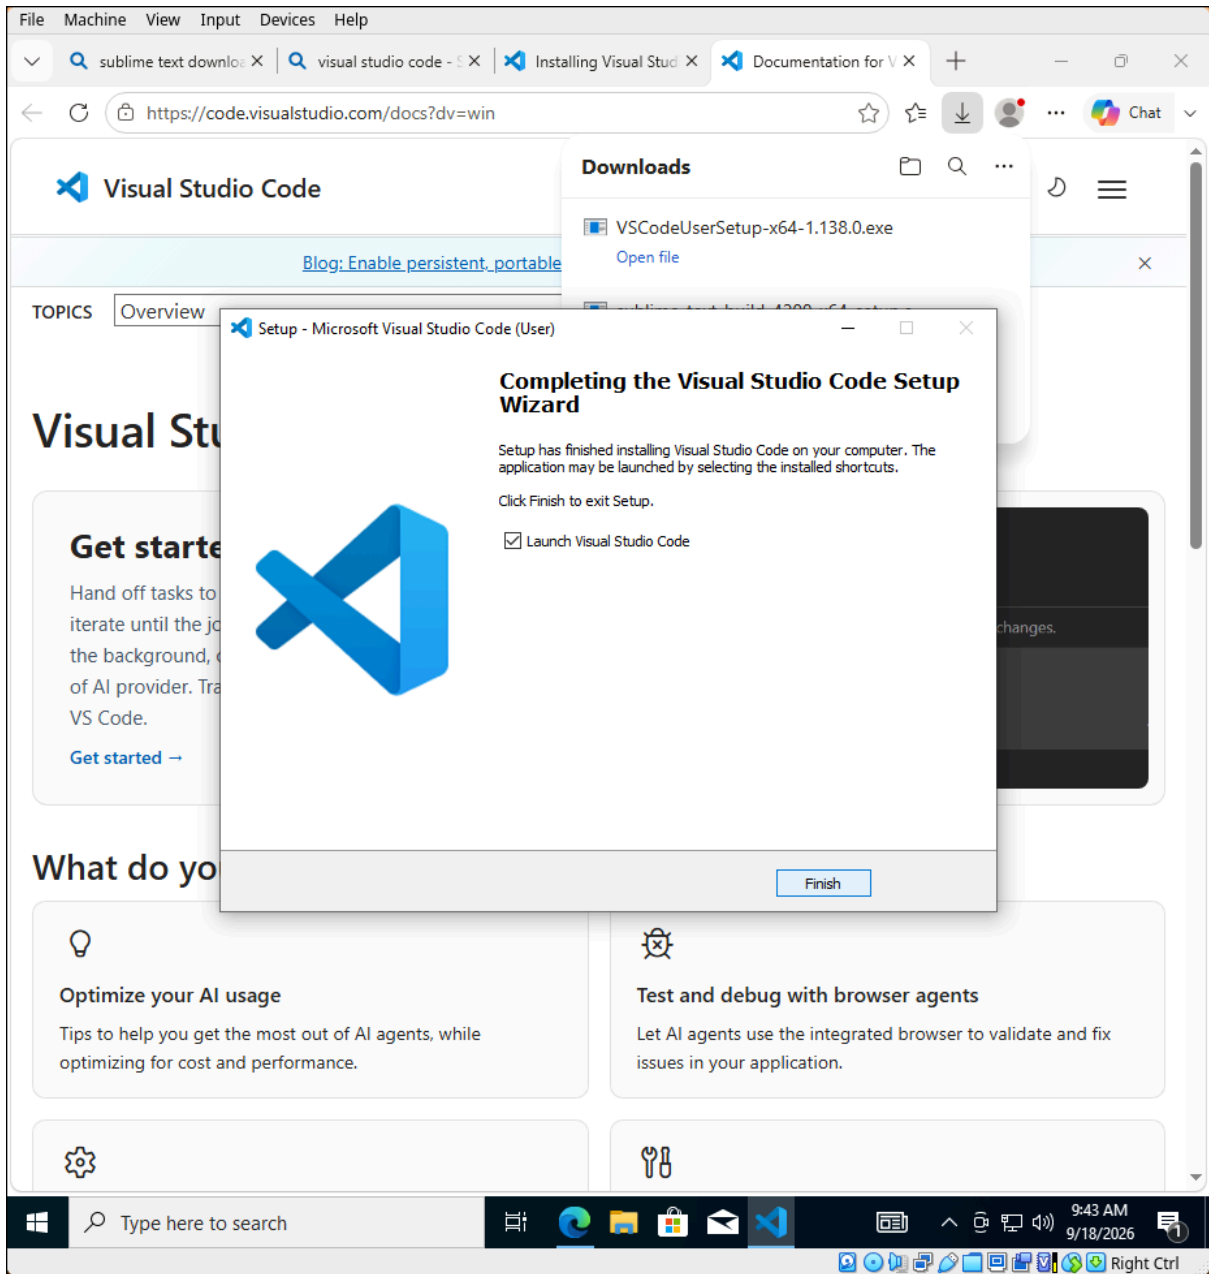

- Download the [Visual Studio Code User setup](#) for Windows.
- Run the installer, `VSCodeUserSetup-{version}.exe`.

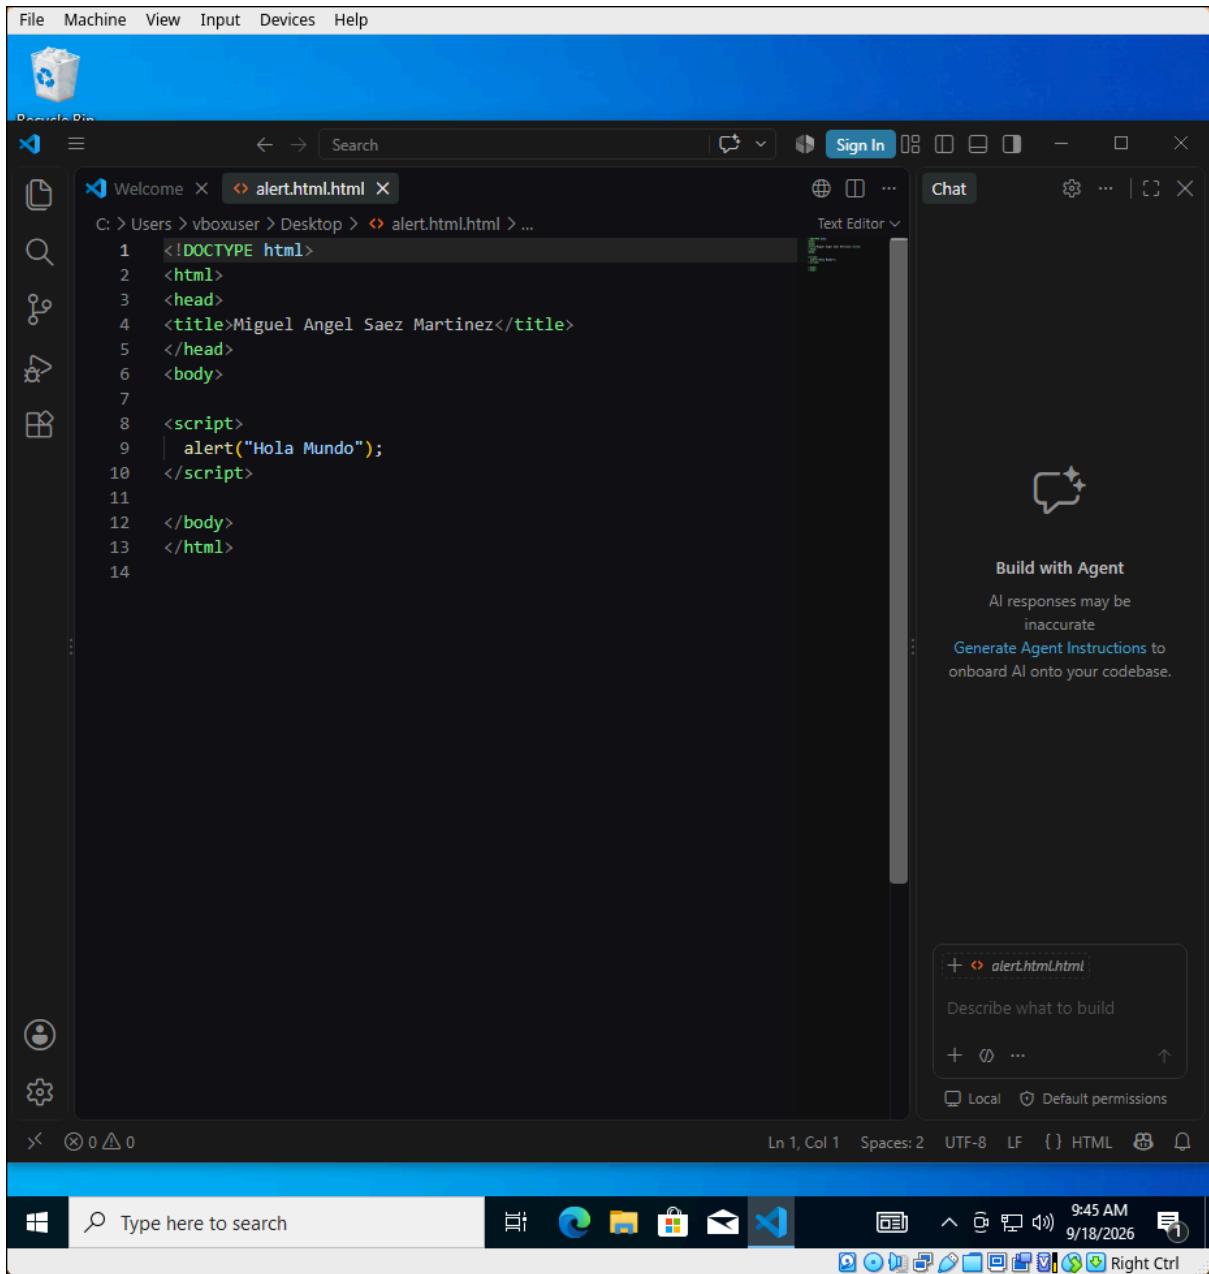

By default, the User setup installs VS Code under `C:\Users\{Username}\AppData\Local\Programs\Microsoft VS Code`.
